Projects

Apex

- Apex is developed to automate the generation of AUC/A and RC-T reports.
- It's a **Bank of New York Mellon's** internal project.
- Wrote test cases heavily using Junit and Mockito to achieve them their target coverage in SonarQube.
- Tools and Technologies used - Java 11, Spring Boot, Hibernate, Junit, Mockito & Oracle SQL.

Baseline

- Baseline brings the team's work together in one shared space and automates team's workflow.
- It's a **Bank of New York Mellon's** internal tool.
- Developed complex solutions and guided other team members as well to build complex solutions.
- Helped businesses to automate and optimize their manual work they do with different software on daily basis by providing them various solutions.

Hepier

- A web app that allow pet service providers to get listing into this platform, generate their profile , scheduling and taking booking from the consumers.
- Started building this project from scratch and worked closely with the product owner and implemented various feature like authentication, booking system, dashboards for service provider and consumer on frontend and backend both.
- Created various UI components for Home, Search, Profile, Booking, Review, Login, and Sign Up section using UI library Vuetify.
- Created APIs and did DB design for whole app.
- Tool and Technologies used - Nuxt JS, Vue JS, Vuex, Vuetify, Express JS, Mongoose and Mongo DB.
